SUMMARY

DevOps Engineer with 4.5 years of **AWS cloud** infrastructure experience, delivering 30% cost savings and 99.9% uptime through automation and **CI/CD** optimization. Award-winning performer skilled in Infrastructure as Code, observability solutions, and **GenAI implementations**.

PROFESSIONAL EXPERIENCE

DevOps / Cloud Engineer

February 2022 – Present

Tata Consultancy Services (TCS)

Pune, India

- Integrated **AWS services** with **Datadog** and **PagerDuty** to enable real-time monitoring and alerting for production incidents; managed infrastructure using **Terraform**.
- Engineered migration of application microservices from **x86-64** to **arm64** platform, achieving 30% cost optimization.
- Utilized **Datadog** to monitor infrastructure performance, track key metrics, and set up custom alerts for proactive issue resolution.
- Provided infrastructure support through ticket-based workflows, including **GitHub** access management, **Kafka** database requests, and general cloud operations queries.
- Carried out monthly server patching for instances on **EC2** to get them the latest security updates and issue fixes with a **CircleCI pipeline** while maintaining 99.9% uptime.
- Developed 5+ automation tools using **AWS Lambda** with Python API libraries for **Slack** and **Jira** to standardize and speed up the deployment process of production changes.
- Orchestrated seamless migration of 5+ microservices from **Terraform** to **OpenTofu** without impacting the existing configuration of resources.
- Implemented monitoring of application microservices hosted on **AWS ECS Fargate** as well as for utility servers on EC2 with Datadog. Implemented log pipelines and trace retention filters which allowed complete observability on the application's inner workings for troubleshooting issues.
- Implemented CI/CD pipelines in **CircleCI** and GitHub Actions, increasing deployment frequency to production by 3x.
- Built a data pipeline for ingesting documents into the data source of a knowledge base in Amazon Bedrock as part of building a chatbot service for the client company.
- Carried out regular updates on **RDS databases** and **OpenSearch** clusters during off-peak hours to reduce business impact in case of downtime.
- Provided assistance on infrastructure incidents through 24x7 on-call schedule.

TECHNICAL SKILLS

- **Cloud:** AWS (EC2, ECS Fargate, Lambda, S3, VPC, IAM, RDS, DynamoDB, Bedrock, Route53, CloudWatch)
- **Infrastructure as Code:** Terraform, OpenTofu
- **CI/CD - Continuous Integration/Continuous Deployment:** CircleCI, GitHub Actions, Jenkins.
- **Container Orchestration:** Docker, ECS, Kubernetes.
- **Monitoring & Incident Management:** Datadog, CloudWatch, PagerDuty, ServiceNow.
- **Scripting:** Python, Bash.
- **Version Control:** GitHub.
- **Operating Systems:** Linux (Ubuntu, Amazon Linux), Windows Server.
- **GenAI:** Understanding of generative AI concepts and cloud-based GenAI services.

CERTIFICATIONS

- GitHub Actions Certification (2026 – 2028)
- Microsoft Azure Administrator Associate (AZ-104) (2026 – 2027)
- The Complete DevOps Bootcamp — Udemy / KodeKloud (Course)
- Azure DevOps Fundamentals — Udemy (Course)
- AWS Certified Cloud Practitioner — Udemy (Course)

EDUCATION

Dr. Babasaheb Ambedkar Technological University

Bachelor of Technology in Electrical Engineering

2017 – 2021

Lonere, Maharashtra, India

ACHIEVEMENTS

- Received **On Spot Award** for consistently delivering high-quality work and ensuring seamless execution throughout the quarter.
- Received the **Best Team Award (2023–2024)** for contributing to overall team performance and ensuring **end-to-end client satisfaction**.
